

FOREWORD

With this issue the *Index of Biochemical Reviews* will have covered 20 years of review articles in biochemistry, molecular and related biological sciences and I take this opportunity to thank all past and present collaborators who have contributed so much to the production of these annual supplements to *FEBS Letters*. In particular, I should like to express my appreciation to Ruth E. Arnstein, Anne V. Dalton, S.P. Datta and Doris E. Herriott for their work on the *IBR '90*. Regrettably, publication of this volume has been delayed because of illness and I apologize for the late publication, but I hope that it is a case of 'better late than never'.

It is possible that the current volume may be the last, at least in its present format, and discussions are under way to consider whether current production costs justify publication of the *IBR* as a supplement of *FEBS Letters*. In this connection, I should welcome receiving the views of readers concerning the usefulness of the *Index of Biochemical Reviews* and suggestions for changes. It is likely that continued publication will depend on the degree of interest shown by the current readership. Comments should be sent as soon as possible to Professor H.R.V. Arnstein, 15 Hurst Avenue, Highgate, London N6 5TX, UK.

H.R.V. Arnstein
